

A SPECIAL THANK YOU TO EVERYONE

The Student National Medical Association (SNMA) would like to thank everyone for their participation and support during the 43rd Annual Medical Education Conference (AMEC) held in New York City, March 19-23, 2008.

Attracting students and professional from all levels of medical education, the AMEC is consistently the largest gathering of under-represented minority medical students at any time in any place in the country. This year's annual national conference was a tremendous success, far exceeding our expectations for attendance, with participation by more than 2,000 individuals including registered members (medical students, pre-medical students, advisors, residents and physicians), exhibitors, speakers and presenters, administrators and observers from all over the United States and abroad. The AMEC includes the National Convention, Pre-medical Forum (for Pre-medical Students) and Educational Tracks for Medical Students and Residents.

This year's theme ... *Leadership in Medicine: Science to Service* ... celebrated the important role that SNMA plays in preparing its members to become future leaders in the medical arena, whether through research, academic medicine, public health or clinical practice. From the work of SNMA leadership and planning teams, a record number of 106 Professional Hall and 90 Pre-medical Forum Recruitment Fair Exhibit Booths were available during this year's AMEC as well as a record number of 3 Plenary Sessions, 18 Sponsored Breakfasts and Receptions, and 9 Clinical Skills Workshops.

COMING SOON ...

SLIDE SHOW PRESENTATION FOR THE 2008 AMEC
